## We are postponing some planned maintenance

**The coronavirus pandemic is affecting all of society and we at Bostaden are no exception. In order to minimise the risk of spreading infection, we have decided not to begin any planned maintenance inside our apartments. The fact that you are receiving this information means a planned maintenance project in your apartment has been postponed.**

We do not currently know how long we will have to postpone the planned projects for. Once the situation has returned to normal and interior projects can begin again, you will of course receive information about this.

### **How this will affect you**

We will of course complete any work that we have already begun in apartments. We and our contractors naturally follow the Public Health Agency of Sweden's recommendations and take the necessary precautions.

### **Examples of maintenance and projects inside apartments that we are postponing:**

- Window replacement
- Bathroom renovations
- Ventilation units and air flow control in apartments
- Renovation, redevelopment and extension of electrical facilities
- Replacement of apartment doors
- Projects in properties where there is a high-risk group according to the Public Health Agency of Sweden.

### **We are reprioritising**

As some planned projects are postponed, we are reprioritising and carrying out other projects that minimise the risk of spreading infection. This means, among other things, that we are bringing forward a number of projects, such as replacing roofs, renovating district heating centres, painting, replacing lampposts, renovating laundries and so on. You will receive information about this if it affects you.

### **Do you have any questions or concerns?**

You are always welcome to contact us if you have any questions.

Yours sincerely,  
Bostaden
